This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): A compound represented by the formula (I):

wherein

X is ~~an oxygen atom~~ or a sulfur atom;

C* and C** are each independently an asymmetric carbon;

R¹ and R² are

the same or different and each is methyl, ethyl or isopropyl, or form isoindoline together with the nitrogen atom they are bonded to a lower alkyl group optionally having substituent(s), an aralkyl group optionally having substituent(s) or an aryl group optionally having substituent(s), or R¹ and R² optionally form, together with the nitrogen atom they are bonded to, an aliphatic heterocycle optionally having substituent(s) (the aliphatic heterocycle is optionally condensed with an aromatic hydrocarbon);

R³ is

a lower alkyl group optionally having substituent(s), an aralkyl group optionally having substituent(s), an aryl group optionally having substituent(s) or a heteroaryl group optionally having substituent(s);

R^4 and R^5 are

the same or different and each is a lower alkyl group optionally having substituent(s), an aralkyl group optionally having substituent(s) or an aryl group optionally having substituent(s), or R^4 and R^5 optionally form, together with the asymmetric carbons they are respectively bonded to, a homocyclic ring optionally having substituent(s) or a heterocycle optionally having substituent(s); and

R^6 and R^7 are

the same or different and each is a hydrogen atom or a lower alkyl group optionally having substituent(s),

or a salt thereof.
